Alternative layouts below created using the same graphics and framework. The simple tool-less assembly means set-up is both fast and easy and can be done by one person in less than 15 minutes. Create a seamless 4.84 meter display wall with a system which fits easily into the boot of a car.

Above layouts created with an ISOframewave Midi 6 panel stand

The World's first fully flexible display system

For larger or smaller displays simply add or remove sections as required.

All graphics are 800mm wide so they can be easily interchanged with each other.

FASTclamp connector secures the base support to the post instantly, without tools.

The Flexi-wave link creates a strong and stable framework that allows every graphic panel to be individually shaped.

Magnetically supported graphics give a perfect fit without curl.

Graphics 'float' on the frame eliminating misalignment on uneven floors.

The i-line Intelligent Graphic Alignment System perfectly aligns your graphics.
